1. Applicant's election with traverse of the apparatus claims in the reply filed on 10/7/2005 is acknowledged. The traversal is on the ground(s) that Applicant cannot make a proper election among the designated groups. This is not found persuasive because Applicant was not limited to the contents of original claim 1 or current claim 31. The restriction is between statutory categories of invention wherein Applicant was limited to apparatus claims for an ice bagging machine by original presentation. However, the details of the identification means, the sensors, the reading and measuring means and the bag with indicia that are part of the other claim groupings all could have been claimed as part of the overall ice bagging machine in the form of apparatus claims. It is a choice made by Applicant not to submit more detailed apparatus claims and to limit the claims only to methods and the subcombination of a bag. Nevertheless, as explained previously, the method claims and the subcombination of a bag only are different statutory categories of invention that have been properly restricted by original presentation and will not be examined in this application.

The requirement is still deemed proper and is therefore made FINAL.

2. Claims 2-30 are withdrawn from further consideration pursuant to 37 CFR 1.142(b), as being drawn to a nonelected invention, there being no allowable generic or linking claim. Applicant timely traversed the restriction (election) requirement in the reply filed on 10/7/2005.

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

Art Unit: 3751

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

4. Claim 31 is rejected under 35 U.S.C. 102(b) as being anticipated by Lamka et al. (3,712,019). Lamka discloses an ice bagging apparatus including a means for producing ice at 159, a means for bagging ice 20, at least one box 25 slidably engaged with at least one tray 24, and a generic means for dispensing the bagged ice 29.
5. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
